GCSE COMBINED SCIENCE: TRILOGY

Foundation Tier Physics Paper 2F

Time allowed: 1 hour 15 minutes

Materials

For this paper you must have:

- a protractor
- a ruler
- · a scientific calculator
- the Physics Equations Sheet (enclosed).

Instructions

- Use black ink or black ball-point pen.
- · Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer all questions in the spaces provided.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked
- In all calculations, show clearly how you work out your answer.

Information

- The maximum mark for this paper is 70.
- The marks for questions are shown in brackets.
- You are expected to use a calculator where appropriate.
- You are reminded of the need for good English and clear presentation in your answers.

	The infrared detector measures the power of the infrared radiation emitted by the flasks.
0 2 . 1	The student poured hot water into each flask.
	What should the student do to reduce the risk of burning herself with the hot water? [1 mark]
0 2.2	Describe how the student should use the equipment in Figure 2 to compare the power of the infrared radiation emitted by each surface. [4 marks]
	Question 2 continues on the next page

A student investigated how the power of the infrared radiation emitted from a flask changed with time.

Table 1 shows the results.

Table 1

Time in seconds	Power in watts
0	8.0
60	7.2
120	6.5
180	5.9
240	5.4
300	5.0
360	4.7
420	4.5

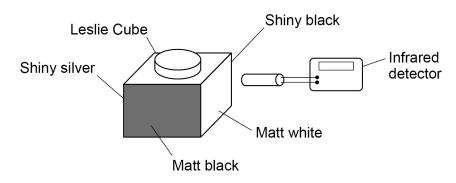

0 2 . 3	Describe the pattern shown by the data in Table 1 .	[2 marks]
0 2 . 4	What is the most likely value for the power of the infrared radiation emitted after 480 seconds?	
	Use Table 1 .	[1 mark]
	Tick (✓) one box.	
	4.0 W 4.4 W 4.6 W	

A Leslie Cube is used to demonstrate that different surfaces emit different amounts of infrared radiation.

Figure 3 shows an infrared detector and a Leslie Cube filled with hot water.

Figure 3

0 2 . 5	Give one advantage of using a Leslie Cube rather than the equipment in Figure 2 on page 4.
	[1 mark]
0 2.6	The teacher improved the demonstration by using four infrared detectors connected to a data logger and computer. Each detector was pointed at a different surface of the Leslie Cube.
	The distance between the surface and the detector was the same in each case.
	Give two reasons why this improved the demonstration.
	[2 marks]
	1
	2

11

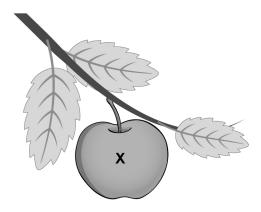

0 3 Figure 4 shows an apple hanging from a tree.

The **X** marks the centre of mass of the apple.

Figure 4

0	3	1	Draw an arrow on Figure 4 to represent the weight of the apple
·			Braw an arrow on Figure 1 to reprocent the weight of the apple

[1 mark]

0 3 . **2** The apple has a mass of 0.150 kg

gravitational field strength = 9.8 N/kg

Calculate the weight of the apple.

Use the equation:

weight = mass × gravitational field strength

[2 marks]

Weight = N

0 3.3	The apple in Figure 4 is stationary.	
	Why is the apple stationary? [1 mark]	
	Tick (✓) one box.	
	The resultant force on the apple is downwards.	
	The resultant force on the apple is upwards.	
	The resultant force on the apple is zero.	
	Question 3 continues on the next page	

	When the apple is ripe it falls from the tree and accelerates towards the ground.	ou
0 3.4	Why does the apple accelerate? [1 mark] Tick (✓) one box.	
	The resultant force on the apple is downwards.	
	The resultant force on the apple is upwards.	
	The resultant force on the apple is zero.	
0 3 . 5	The acceleration of the apple is 9.8 m/s ²	
	The velocity of the apple changes from 0 to 4.9 m/s	
	Calculate the time taken for the apple to fall to the ground.	
	Use the equation:	
	time taken = $\frac{\text{change in velocity}}{\text{acceleration}}$	
	acceleration [2 marks]	
		_
		_

0 4 Figure 5 shows a compass.

Figure 5

0 4 . 1	Why does the compass always point in the s	same direction when it is not near	
	a magnet? Tick (✓) one box.	[1 mark]
	The compass is not magnetic.		
	The Earth has a magnetic field.		
	There is no force acting on the compass.		
0 4.2	What material could the needle of the compa		1 mark]
	Tick (✓) one box.	•	
	Aluminium		
	Copper

Turn over for the next question

14 0 5 The stopping distance of a car is the sum of the thinking distance and the braking distance. 0 5 Which factors affect the thinking distance? [2 marks] Tick (✓) **two** boxes. Condition of the tyres Driving on wet roads Mass of the car Tiredness of the driver Using a mobile phone 0 5 Explain why a person should **not** drink alcohol and then drive. [3 marks]

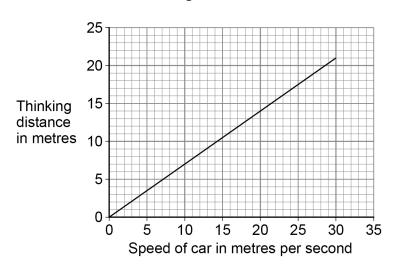

Do not write outside the

The Highway Code gives information on how thinking distance depends on the speed of a car.

Figure 7 shows the information as a graph.

Figure 7

0	5	. 3	What is the speed of a ca	ar if the thinking distance is	16 m?
---	---	-----	---------------------------	--------------------------------	-------

[1 mark]

Speed of car = m/s

	Describe the relationship between speed and thinking distance.	5 .	0
[2 marks]			

0 5 . 5 The Highway Code assumes the driver's reaction time is 0.70 seconds.

Draw a line on **Figure 7** to show the relationship for a driver with a reaction time of 1.4 seconds.

[2 marks]

0 5.6	A car accelerates at 5.0 m/s^2 over a distance of 45 m initial velocity of the car = 0 m/s	Do out
	Calculate the final velocity of the car. Use the Physics Equations Sheet.	
	Give your answer to 2 significant figures. [4 marks]	
	Final velocity (2 significant figures) = m/s	1

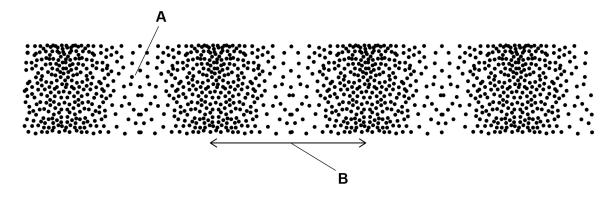

Do not write outside the Turn over for the next question DO NOT WRITE ON THIS PAGE ANSWER IN THE SPACES PROVIDED

0 6 Figure 8 shows a longitudinal wave.

0 6 . 1 What do the labels A and B on Figure 8 represent?

Choose answers from the box.

[2 marks]

amplitude	frequency	rarefaction	reflection	wavelength

Α_____

B_____

	19			
0 6 . 2	The wave shown in Figure 8 has a frequency of 4.0 kHz			Do not write outside the box
	Calculate the period of the wave.			
	Use the Physics Equations Sheet.			
	Give the unit.		[4 marks]	
	Period =	Unit		
	Question 6 continues on the next page			

Sound waves are longitudinal.

Figure 9 shows how the speed of sound varies with the temperature of the air.

Temperature in °C

	Use the Physics Equations Sheet to answer questions 06.3 and 06.4 .	Do ou
0 6.3	Write down the equation that links frequency (f), wavelength (λ) and wave speed (v). [1 mark]	
0 6.4	A sound wave with a frequency of 300 Hz travels through the air.	
	The air has a temperature of 28.0 °C	
	Determine the wavelength of the sound wave.	
	Use Figure 9.	
	[4 marks]	
	Wavelength =m	
	Turn over for the next question	

0 7

Figure 10 shows competitors in the wheelchair race at the London Marathon.

The distance of the London Marathon is 42 000 m

Figure 10

	Use the Physics Equations Sheet to answer questions 07.1 and 07.2 .
0 7.1	Write down the equation that links distance (s), force (F) and work done (W). [1 mark]
	During the race competitors work against air resistance
0 7 . 2	During the race competitors work against air resistance.
	The work done against air resistance by the winner of the race was 3 360 000 J
	Calculate the average air resistance acting on the winner of the race. [3 marks]
	Average air resistance =N
	Overtion 7 continues on the next next
	Question 7 continues on the next page

	Use the Physics Equations Sheet to answer questions 07.3 and 07.4 .	
0 7.3	Which equation links distance travelled, speed and time? Tick (✓) one box.	[1 mark]
	distance travelled = speed × time	
	time = distance travelled × speed	
	speed = distance travelled × time	
0 7.4	The distance of the London Marathon is 42 000 m The winning time for the race was 5600 seconds.	
	Calculate the average speed of the winner of the race.	
		[3 marks]
	Average speed =	m/s

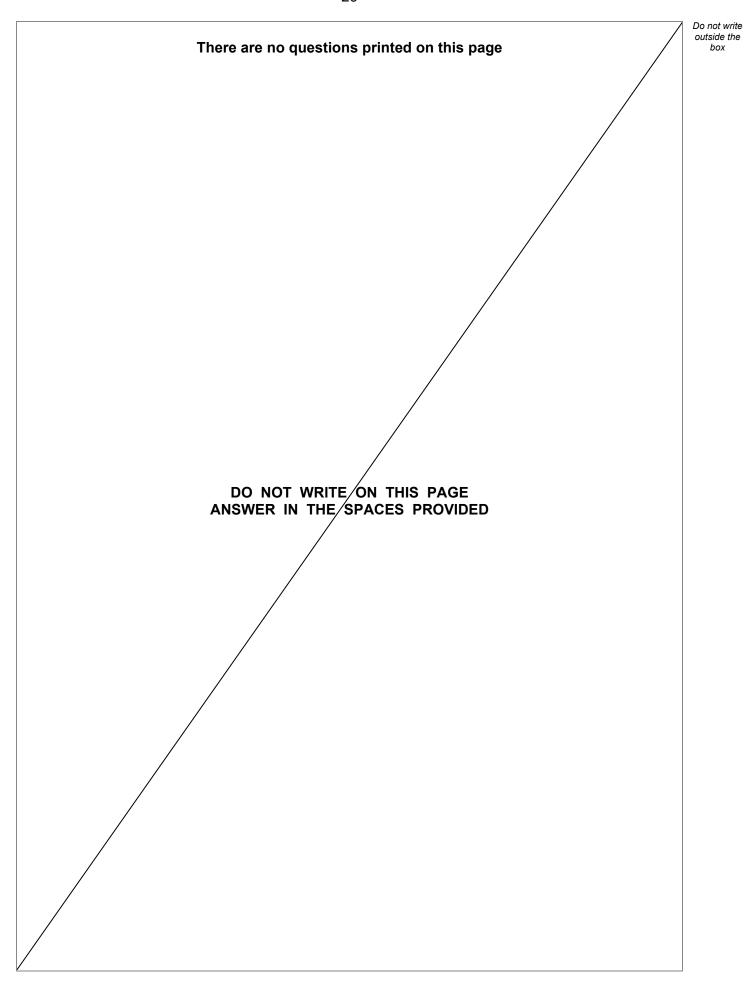

0 7.5	Explain why the speed of a competitor changes during the race.	[4 marks]	outside th box
			12

END OF QUESTIONS

Do not write

Question number	Additional page, if required. Write the question numbers in the left-hand margin.
