
0	1
---	---

Charles Darwin proposed the theory of natural selection.

Many people at the time did not accept his theory.

0	1	.	1
---	---	---	---

There was a different theory at the same time as Darwin's theory.

The different theory said that changes in an organism during its life could be inherited.

Who proposed this theory?

[1 mark]

0 1 . 2 Studying fossils helps scientists understand how living things have evolved.

Figure 1 shows a fossilised snake.

Figure 1

Explain how the fossil in **Figure 1** may have formed.

[3 marks]

Question 1 continues on the next page

There are many types of rat snake in the world.

Table 1 shows two types of rat snake

Table 1

		
Type of snake	Japanese rat snake	Texas rat snake
Colour of snake	Green	Pale brown
Type of environment	Grass	Dry and dusty

0 1 . 3 The different types of rat snake have evolved from similar ancestors.

The rat snakes have evolved to suit their environments.

Explain how the Japanese rat snake evolved to be different from the Texas rat snake.

[4 marks]

0 1 . 4 Many species of snake have become extinct.

Give **one** reason why a species might become extinct.

[1 mark]
