

0 3

Phototropism is a growth response by part of a plant to light.

0 3 . 1

Name **one** other tropism.

Give the stimulus the plant responds to in the tropism you have named.

[2 marks]

Tropism _____

Stimulus _____

0 3 . 2

Plan an investigation to show the effect of light from one direction on the growth of plant seedlings.

Include details of any controls needed.

You may use some of the equipment shown in **Figure 4** and any other laboratory apparatus.

[6 marks]

Figure 4

Lamp

Several pots of seedlings

Scissors

Ruler

Cardboard boxes with lids

Do not write
outside the
box

0 3 . 3 Explain how phototropism in a plant shoot helps the plant to survive. **[3 marks]**

Question	Answers	Extra information	Mark	AO / Spec.
03.1	named example of tropism – eg geotropism / gravitropism	allow hydrotropism or chemotropism or thermotropism	1	AO1 4.5.4.1
	correct corresponding stimulus – eg gravity	allow water or chemical or 'heat'	1	
03.2	Level 3: The method would lead to the production of a valid outcome. All key steps are identified and logically sequenced.		5–6	AO1 AO2 4.5.4.1
	Level 2: The method would not necessarily lead to a valid outcome. Most steps are identified, but the plan is not fully logically sequenced.		3–4	
	Level 1: The method would not lead to a valid outcome. Some relevant steps are identified, but links are not made clear.		1–2	
	No relevant content		0	
	Indicative content <ul style="list-style-type: none"> • several seedlings in each batch or one pot of seedlings in each batch • measure heights of shoots • leave some in dark with light from one side / direction in box with hole • control(s) with all-round light or rotating on clinostat or in dark • control variable(s) eg same temperature / water / soil type • after suitable time (at least several hours) • record appearance of seedlings re. light direction • re-measure heights of shoots • detail of how bent shoots were measured – eg use thread or straighten them out • calculate mean height increase for each group • use ruler / protractor to estimate angle of bending <p>for level 3 a reference to comparing the growth of plants with light from one direction with plants either in darkness or in full light along with a control variable is required</p>
